Mechanisms of Ageing and Development
75 (1994) 241–244

mechanisms of ageing and development

Subject index

Volume 75 (1994)

Adherence; Age; Macrophage; Chemotaxis; Physical activity stress **75**, 179

Adrenergic receptors; Ageing; Glucagon; Glycogenolysis; Desensitization; Hepatocytes **75**, 45

Age; Macrophage; Adherence; Chemotaxis; Physical activity stress **75**, 179

Ageing; Glucagon; Glycogenolysis; Desensitization; Hepatocytes; Adrenergic receptors **75**, 45

Ageing; Inorganic pyrophosphate; Growth factors; CPPD disease; Cartilage **75**, 35

Aging; Cerebellar cortex; Neurons; Nissl's bodies; Lipofuscin; Monoamine oxidase-(MAO) B; L-Deprenyl **75**, 157

Aging; Concentric bodies; Supraoptic nucleus; Mouse **75**, 131

Aging; Glucocorticoid receptor; Low-affinity glucocorticoid binding sites; Tyrosine aminotransferase **75**, 227

Aging; Gluconeogenesis; Lactate; Fructose **75**, 81

Aging; Lymphocyte; Proliferation; Docosahexaenoic acid; Omega-3 fatty acids **75**, 95

Aging; Natural killer cells; Indomethacin; Interleukin-2 **75**, 115

Aging; Neurofilament proteins; Cytoskeleton; Cerebellar cortex; Dihydropyridine-type Ca^{2+} antagonists; Darodipine **75**, 169

Aging; Protein oxidation; Free radicals; Oxygen radicals; Oxidative damage **75**, 11

Aging; Replicative senescences; Restriction enzyme; Mitosis **75**, 205

Allium cepa; Ethylene; Nucleolar organizer region; Quiescent; Senescence; Point of no return; Karyoskeleton **75**, 141

Alzheimer's Disease; Leukocytes; Down syndrome; Membrane fluidity; Plasma membrane; Anisotropy **75**, 1

Anisotropy; Leukocytes; Alzheimer's Disease; Down syndrome; Membrane fluidity; Plasma membrane **75**, 1

Body temperature; Energy restriction; Cellular proliferation; Fischer 344 rats **75**, 59

Cartilage; Ageing; Inorganic pyrophosphate; Growth factors; CPPD disease **75**, 35

Cell proliferation; Moyamoya disease; Cultured smooth muscle cells; In vitro senescence; DNA synthesis **75**, 21

Cellular proliferation; Energy restriction; Body temperature; Fischer 344 rats **75**, 59

Cerebellar cortex; Aging; Neurons; Nissl's bodies; Lipofuscin; Monoamine oxidase-(MAO) B; L-Deprenyl **75**, 157

Cerebellar cortex; Neurofilament proteins; Cytoskeleton; Aging; Dihydropyridine-type Ca^{2+} antagonists; Darodipine **75**, 169

Chemotaxis; Age; Macrophage; Adherence; Physical activity stress **75**, 179

Cholesterol α-7-reductase; LDL Receptor mRNA; Cholesterol; Growth hormone releaing hormone; Growth hormone releasing hexapeptide **75**, 215

Cholesterol; LDL Receptor mRNA; Cholesterol α-7-reductase; Growth hormone releaing hormone; Growth hormone releasing hexapeptide **75**, 215

Concentric bodies; Aging; Supraoptic nucleus; Mouse **75**, 131

CPPD disease; Ageing; Inorganic pyrophosphate; Growth factors; Cartilage **75**, 35

Cultured smooth muscle cells; Moyamoya disease; In vitro senescence; Cell proliferation; DNA synthesis **75**, 21

Cytoskeleton; Neurofilament proteins; Aging; Cerebellar cortex; Dihydropyridine-type Ca^{2+} antagonists; Darodipine **75**, 169

Darodipine; Neurofilament proteins; Cytoskeleton; Aging; Cerebellar cortex; Dihydropyridine-type Ca^{2+} antagonists **75**, 169

Deletions; Mitochondrial DNA; Muscle; Rhesus monkeys **75**, 69

Desensitization; Ageing; Glucagon; Glycogenolysis; Hepatocytes; Adrenergic receptors **75**, 45

Dihydropyridine-type Ca^{2+} antagonists; Neurofilament proteins; Cytoskeleton; Aging; Cerebellar cortex; Darodipine **75**, 169

DNA synthesis; Moyamoya disease; Cultured smooth muscle cells; In vitro senescence; Cell proliferation **75**, 21

Docosahexaenoic acid; Aging; Lymphocyte; Proliferation; Omega-3 fatty acids **75**, 95

Down syndrome; Leukocytes; Alzheimer's Disease; Membrane fluidity; Plasma membrane; Anisotropy **75**, 1

Energy restriction; Body temperature; Cellular proliferation; Fischer 344 rats **75**, 59

Ethylene; *Allium cepa*; Nucleolar organizer region; Quiescent; Senescence; Point of no return; Karyoskeleton **75**, 141

Fischer 344 rats; Energy restriction; Body temperature; Cellular proliferation **75**, 59

Free radicals; Protein oxidation; Aging; Oxygen radicals; Oxidative damage **75**, 11

Fructose; Gluconeogenesis; Lactate; Aging **75**, 81

Glucagon; Ageing; Glycogenolysis; Desensitization; Hepatocytes; Adrenergic receptors **75**, 45

Glucocorticoid receptor; Low-affinity glucocorticoid binding sites; Tyrosine aminotransferase; Aging **75**, 227

Gluconeogenesis; Lactate; Fructose; Aging **75**, 81

Gluconeogenesis; LDH activity; Isozyme; Skeletal muscle **75**, 191

Glycogenolysis; Ageing; Glucagon; Desensitization; Hepatocytes; Adrenergic receptors **75**, 45

Growth factors; Ageing; Inorganic pyrophosphate; CPPD disease; Cartilage **75**, 35

Growth hormone releaing hormone; LDL Receptor mRNA; Cholesterol; Cholesterol α-7-reductase; Growth hormone releasing hexapeptide **75**, 215

Growth hormone releasing hexapeptide; LDL Receptor mRNA; Cholesterol; Cholesterol α-7-reductase; Growth hormone releaing hormone **75**, 215

Hepatocytes; Ageing; Glucagon; Glycogenolysis; Desensitization; Adrenergic receptors **75**, 45

In vitro senescence; Moyamoya disease; Cultured smooth muscle cells; Cell proliferation; DNA synthesis **75**, 21

Indomethacin; Natural killer cells; Interleukin-2; Aging **75**, 115

Inorganic pyrophosphate; Ageing; Growth factors; CPPD disease; Cartilage **75**, 35

Interleukin-2; Natural killer cells; Indomethacin; Aging **75**, 115

Isozyme; LDH activity; Gluconeogenesis; Skeletal muscle **75**, 191

Karyoskeleton; *Allium cepa*; Ethylene; Nucleolar organizer region; Quiescent; Senescence; Point of no return **75**, 141

L-Deprenyl; Cerebellar cortex; Aging; Neurons; Nissl's bodies; Lipofuscin; Monoamine oxidase-(MAO) B **75**, 157

Lactate; Gluconeogenesis; Fructose; Aging **75**, 81

LDH activity; Isozyme; Gluconeogenesis; Skeletal muscle **75**, 191

LDL Receptor mRNA; Cholesterol; Cholesterol α-7-reductase; Growth hormone releaing hormone; Growth hormone releasing hexapeptide **75**, 215

Leukocytes; Alzheimer's Disease; Down syndrome; Membrane fluidity; Plasma membrane; Anisotropy **75**, 1

Lipofuscin; Cerebellar cortex; Aging; Neurons; Nissl's bodies; Monoamine oxidase-(MAO) B; L-Deprenyl **75**, 157

Low-affinity glucocorticoid binding sites; Glucocorticoid receptor; Tyrosine aminotransferase; Aging **75**, 227

Lymphocyte; Aging; Proliferation; Docosahexaenoic acid; Omega-3 fatty acids **75**, 95

Macrophage; Age; Adherence; Chemotaxis; Physical activity stress **75**, 179

Mammalian aging; Thymus involution **75**, 151

Membrane fluidity; Leukocytes; Alzheimer's Disease; Down syndrome; Plasma membrane; Anisotropy **75**, 1

Mitochondrial DNA; Deletions; Muscle; Rhesus monkeys **75**, 69

Mitosis; Replicative senescences; Restriction enzyme; Aging **75**, 205

Monoamine oxidase-(MAO) B; Cerebellar cortex; Aging; Neurons; Nissl's bodies; Lipofuscin; L-Deprenyl **75**, 157

Mouse; Concentric bodies; Aging; Supraoptic nucleus **75**, 131

Moyamoya disease; Cultured smooth muscle cells; In vitro senescence; Cell proliferation; DNA synthesis **75**, 21

Muscle; Mitochondrial DNA; Deletions; Rhesus monkeys **75**, 69

Natural killer cells; Indomethacin; Interleukin-2; Aging **75**, 115

Neurofilament proteins; Cytoskeleton; Aging; Cerebellar cortex; Dihydropyridine-type Ca^{2+} antagonists; Darodipine **75**, 169

Neurons; Cerebellar cortex; Aging; Nissl's bodies; Lipofuscin; Monoamine oxidase-(MAO) B; L-Deprenyl **75**, 157

Nissl's bodies; Cerebellar cortex; Aging; Neurons; Lipofuscin; Monoamine oxidase-(MAO) B; L-Deprenyl **75**, 157

Nucleolar organizer region; *Allium cepa*; Ethylene; Quiescent; Senescence; Point of no return; Karyoskeleton **75**, 141

Omega-3 fatty acids; Aging; Lymphocyte; Proliferation; Docosahexaenoic acid **75**, 95

Oxidative damage; Protein oxidation; Aging; Free radicals; Oxygen radicals **75**, 11

Oxygen radicals; Protein oxidation; Aging; Free radicals; Oxidative damage **75**, 11

Physical activity stress; Age; Macrophage; Adherence; Chemotaxis **75**, 179

Plasma membrane; Leukocytes; Alzheimer's Disease; Down syndrome; Membrane fluidity; Anisotropy **75**, 1

Point of no return; *Allium cepa*; Ethylene; Nucleolar organizer region; Quiescent; Senescence; Karyoskeleton **75**, 141

Proliferation; Aging; Lymphocyte; Docosahexaenoic acid; Omega-3 fatty acids **75**, 95

Protein oxidation; Aging; Free radicals; Oxygen radicals; Oxidative damage **75**, 11

Quiescent; *Allium cepa*; Ethylene; Nucleolar organizer region; Senescence; Point of no return; Karyoskeleton **75**, 141

Replicative senescences; Restriction enzyme; Aging; Mitosis **75**, 205

Restriction enzyme; Replicative senescences; Aging; Mitosis **75**, 205

Rhesus monkeys; Mitochondrial DNA; Deletions; Muscle **75**, 69

Senescence; *Allium cepa*; Ethylene; Nucleolar organizer region; Quiescent; Point of no return; Karyoskeleton **75**, 141

Skeletal muscle; LDH activity; Isozyme; Gluconeogenesis **75**, 191

Supraoptic nucleus; Concentric bodies; Aging; Mouse **75**, 131

Thymus involution; Mammalian aging **75**, 151

Tyrosine aminotransferase; Glucocorticoid receptor; Low-affinity glucocorticoid binding sites; Aging **75**, 227
